Durable nylon construction

## BBO-HBB-224

HOLDS 7-8 FLAKES OF HAY - this 19x18x26" hay bag with 1.75" square openings holds approx. 7-8 flakes of Timothy, Orchard, Alfalfa, or any other type of hay. Our hay bags were designed to minimize frustration and can be stuffed in seconds.

EXCLUSIVE PATENTED 4-SIDED CONSTRUCTION - this hay bag features Derby Originals patented nylon web design that allows your horse to eat from any part of the hay bag. This design eliminates the risk of material rips and tears found in other hay bags.

# Haybags

BB OVERSEAS

An easy to fill hay bag with small mesh panels on both sides so that the horse has to work to eat. The base and sides are made from a perforated fabric to enable water to drain easily. A good size to accommodate a large quantity of hay. Dimensions: 67.5cm x 37.5cm x 22.5cm.

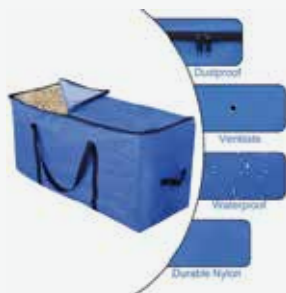

**BBO-HBB-022**

Feed your horses with this Tough-1 Slow FeedWeb Hay Feeder. The entire bag is made from 1" webbing in small 2"x2" openings to slow horses down while eating, making less waste. Plastic frame at the top makes loading hay easy. Adjustable hanging strap with snaps at both ends let you close the top of the hay bag, so horses can't sneak hay from the top. Slow feed hay bags include a strap on the lower back for securing to a stall or trailer in order to keep it from spinning.

- Slow feed hay bags promote less waste
- Plastic frame in the webbing at the top for easy loading
- Adjustable hanging strap with snaps
- Secures to a stall or trailer
- 2" x 2" Openings

# Girths

BB OVERSEAS

Girths are essential saddle accessories that secure the saddle in place, ensuring stability and comfort for both the rider and the horse. Designed with durable, flexible materials, they prevent slippage while allowing the horse unrestricted movement. A well-fitted girth enhances performance and safety, making it a crucial component in equestrian gear.

# Saddle Pads

BB OVERSEAS

Saddle pads are protective layers placed between the saddle and the horse's back, designed to provide cushioning, absorb shock, and prevent friction or chafing. They help distribute the rider's weight evenly, ensuring the horse's comfort during riding. Available in various materials, styles, and thicknesses, saddle pads cater to different riding disciplines and horse needs, making them a vital accessory for equestrian care.

A bridle is a key piece of equestrian equipment used to communicate and guide the horse during riding. It consists of various components, including the headstall, bit, reins, and browband, all working together to provide control and direction. Made from materials like leather or synthetic fibers, bridles come in different styles to suit specific disciplines, ensuring both functionality and the horse's comfort.
